ASSEMBLY NOTES

For wardrobe assembly, you will need extra space: 60mm in width and 30mm in height. For door assembly, you will need extra space: 90mm in height.

PRE-DRILLED HOLES ON INSIDE OF SIDES AND PARTITIONS

Side panels and partitions come full-height punched as standard at 160mm intervals.

GENERAL DIMENSIONS

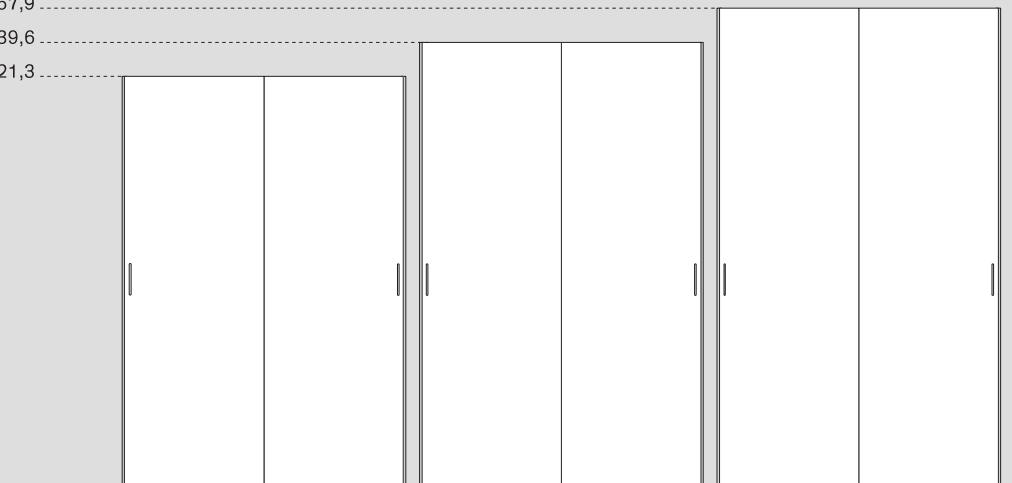

HEIGHTS

Height includes adjustable foot

257,9

239,6

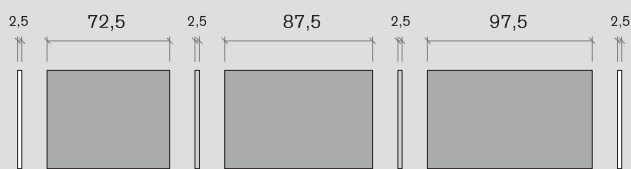

221,3

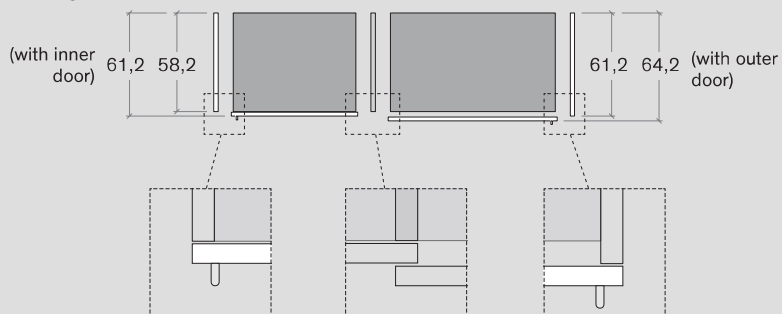

DOOR HEIGHTS

To get the finished height of the wardrobe, add 20mm to allow for the space taken up by the outer door's runner.

WIDTHS

DEPTHS

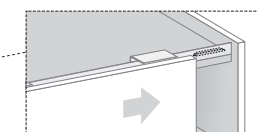

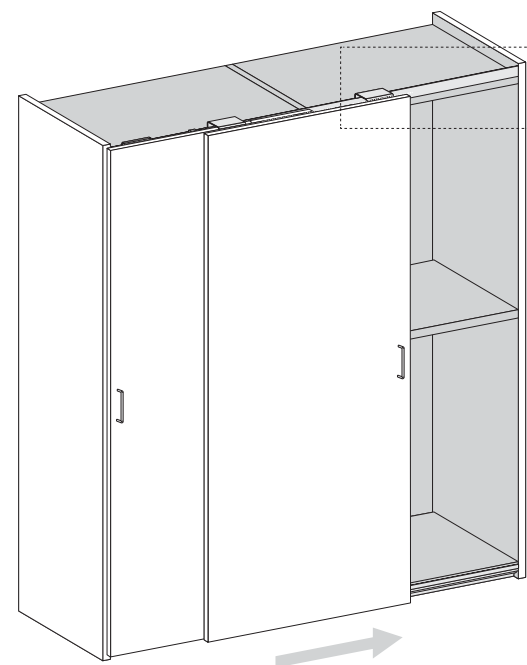

Sliding door wardrobes come fitted as standard with an automatic soft door opening/closing mechanism that uses the Softspace system.

This enables the door to be opened and closed perfectly, at a controlled speed, smoothly and safely even when closed inadvertently. The wardrobe looks just the same: the soft opening/closing system is fastened to the wardrobe's track and on the back of the door. That way, it is completely hidden from view.

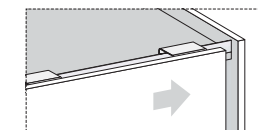

To ensure safety and quality, the Softspace soft opening/closing system is tested at the CATAS laboratories.

Softspace automatic soft opening/closing system

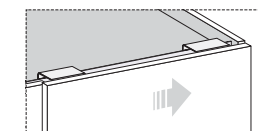

Automatic soft opening/closing system
Closing stop on track

The door features a constant smooth gliding action

As the door is being closed, the Softspace system engages the stop fitted on the track

The closing stop causes the door to close gently and automatically by pressing against the spring inside the Softspace system
