

LIGHTING

There are two solutions to add lighting within the wardrobes. These can be fitted as concealed or recessed lighting units, with a choice of emitted light in Warm White or Cool White shades.

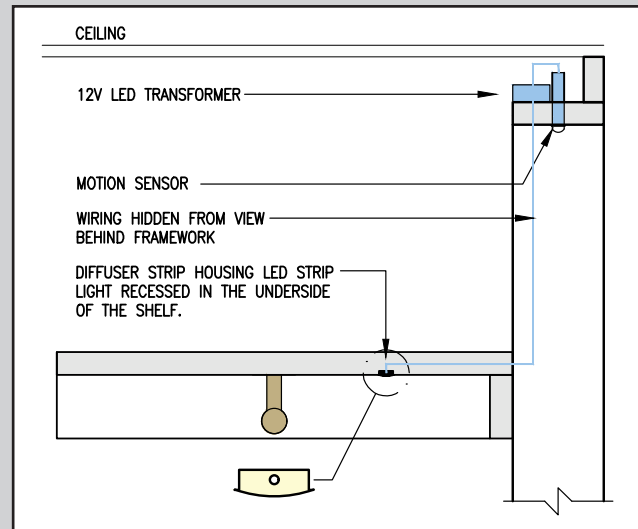

OPTION 1 – CONCEALED LIGHTING

By fitting an angled aluminium profile to the back side of the shelf front bearer, the light illuminates the whole cupboard.

OPTION 2 – RECESSED LIGHTING

This makes more of a feature of the lighting as it is recessed into the underneath of the shelf.
